- quota per la copertura assicurativa contro gli infortuni € 20,00 circa.

Project Summary

The social and solidarity economy represents a niche of activity without scale in the countries of the European Economic Space, especially in Romania. The estimations show the majority of the actors from the business environment know very little about social economy and social entrepreneurship. So we determined to get ourselves involved in the field of training the social entrepreneurs, while being aware of the benefits generated by applying the social economy systems, in regards to increasing the living standards for the disadvantaged communities.

Objectives of the project

1. The acquiring of social entrepreneurship competencies for 36 leaders and youth workers, employers and entrepreneurs from 10 countries (Spain, France, Italy, Germany, Austria, Romania, Bulgaria, Lithuania, Greece and Turkey), through organizing an international training in Arad, Romania, during the period 14th- 18th of June 2016.
2. The development of a collaborative network for the 18 partner organizations of the projects, through the networking workshops organized within the international training, which will take place in Arad, Romania for 5 days, with the attendance of 36 leaders and youth workers, employers and entrepreneurs from Spain, France, Italy, Germany, Austria, Romania, Bulgaria, Lithuania, Greece and Turkey.
3. The development of a business plan, adapted for the social enterprises, as a result of the workshops organized at the international training, which will take place in Arad, for 5 days, with the direct involvement of 36 leaders and youth workers, employers and entrepreneurs from Spain, France, Italy, Germany, Austria, Romania, Bulgaria, Lithuania, Greece and Turkey.
4. Dissemination of the Business plan adapted for the social enterprises as a model of good practice for interested actors in the social economy and solidarity.

Non formal methods

The activities of the “investing in Impact” project will have as working methods the non-formal type such as: presentations, workshops, facilitated talks, briefing sessions, warm-up sessions, team consolidation games, together with the informal ones: intercultural dinners.

The tangible results of the project are: the business plan model for social enterprises, the issue of Youthpass for the 36 participants.
